

Fabio Cocozza

UI Design student

Hi, I'm a 24 years old designer from Italy. At the moment I'm studing UX/ UI design at Start2Impact. In the recent years I studied the basics of Web Design and now I want to go deep in every aspect of the user experience and user interface. Create and improve the design means for me make the product acquire even more value.

Projects I worked on:

User Interface

To complete the courses of UI Design on Start2Impact, I created the user interface and a fully working prototype for the website of the client "Buddhify".

Wireframing

To progress in the UI Design course on Start2Impact, I created 5 wireframes (desktop and mobile) for the client "Buddhify".

HTML & CSS

I made this project to progress in the UI Design course on Start2Impact. It's a personal website/portfolio where I can publish all my experiences and my projects.

Copywriting

I wrote for my course on Start2Impact, a blog post for one of the 17 goals of ONU to help the nature.

Prototyping

To put my knowledge into practice, I usually conduct a redesign for the most popular apps and websites that require a redesign. I have recreated a working prototype for TikTok, WhatsApp and other apps.

Skills:

User research - As-is analysis - User Personas - User flow - User interviews - Competitor analysis - Information architecture (IA) - Heuristic evaluation - Wireframing - Desktop & Mobile design - Prototyping - Mock-up - Typography - Color theory - Create design system
